Experience

This Dot — *Senior Software Engineer* Jan 2021 – Mar 2023

- Oversaw the design, development, and launch of four websites in React, Next, Nx, Nest, and Node for enterprise customer accounts valued at \$400k+, served as the point of contact for stakeholders, and ensured alignment with business requirements.
- Managed teams of 1–5 React and Angular developers, helped hire for projects, performed code reviews, and mentored 4 Full-stack developers to receive multiple promotions in a year.
- Launched 5 Full Stack React apps ensuring risk mitigation, capturing user criteria, and communicating with stakeholders boosting client contract retention rate by 45%.
- Integrated a Full-stack architecture in React, Node, and AWS for 6 FinTech SaaS apps.

Charter Communications — *Application Developer* May 2016 – Dec 2020

- Consolidated Residential and Enterprise portals with Angular, Node, Docker, NgRx, and Cucumber E2E increasing annual service sales by 15%.
- Delivered billing services and UX increasing portal usage and reducing call service time by 20%.
- Collaborated with cross-functional teams to revamp a shared residential and enterprise billing experience in Angular increasing team output by 30%
- Redesigned and scaled the Voice product into a full-featured Enterprise product with microservices.

Great-West Financial — *UI/UX Developer* Sep 2015 – Feb 2016

- Created AngularJS application prototypes increasing product buy-in for corporate investors valued between \$45 million and \$80 billion.
- Extended AngularJS features enabling real-time visualizations and enhancing the testing environment for faster product demos with new prospects.
- Assisted QA with manual test cases for staging and production bringing test coverage to 100%.

AAA Colorado HQ — *IT Help Desk/Full-Stack Developer* Apr 2014 – Sep 2015

- Implemented a SOAP app prototype for AAA NY to assist Roadside towers with locating stranded motorists.
- Designed and developed an AngularJS web app helping insurance agents better manage and track their leads.

Full-Stack Developer — *Aitken Sign Shop* Jun 2010 – May 2013

- Created and self-hosted a branded storefront for customers to submit and access quotes for various print jobs.
